

Creating Higher-Education
Industry Programmes for the
Semiconductor Industry of
Europe

Shaping the Future of Semiconductor Talent

The CHIPS of Europe project addresses the growing demand for skilled professionals in the semiconductor industry. By connecting secondary schools, universities, and industry, we are building a comprehensive talent pipeline that prepares the next generation of chip designers and innovators.

22 Partners

10 Countries

Actions

- Modern Curricula & Microcredentials
- Virtual Labs & Summer Schools
- Industry Partnerships
- Outreach to Youth & Teachers
- Diversity & Inclusion
